Tác The game is First Touch Games, a development game studio based in the UK and a developer specialising in sports games. In addition to this game, they have produced many other football games extremely attractive on many different platforms that are specific to which the Score! The match and Dream League Soccer 2020.Special moments We have witnessed special moments in football, such as Ibrahimovic's backwards bikeshots, Messi's technique or Roberto Carlos's long-rangeshots. In The Score! Hero, you will master these moments by controlling the player to start decisive flyovers or shots that brings the team to victory. If you think this game is similar to Football Manager or PES then you are wrong. You don't have to control all 11 players on the pitch, just control certain players, create nice combinations or great goals. Just like a pre-arranged chess board, it's your job to pull the path of the ball (by dragging the phone screen) to create a poke for teammates or a powerful shot toward your opponent's goal. The ball will fly down the path you are pumping, and as a result you get to see the enemy goalkeeper straight into the net picking up the ball. If the ball falls into the

opponent's legs or the goalkeeper blocks it, you will be charged with a loss. Right now, rating! The hero has more than 580 levels for players, each level has different challenges from simple to heavy. Your achievements are performed like stars. You must reach at least one star to complete the level. Of course, the goal of each player when playing this game is to complete all the three-star levels. Although this is a football game, I find it more like a puzzle game because every level is a puzzle for you to find a way to solve. Starting help or scoring directly with a wonderful curve, it all depends on your creativity. Upgrading players Each player is the pride of their country, the game are called heroes. Result! Hero lets you buy accessories for players such as clothing, shoes, socks,... And you can sign with the club you want. But the players don't have their own indicators, so even Ronaldo or Paul Pogba are like other normal players. You can't see the progress of the players, the only progress is that it's an increasingly difficult level of the game themselves. But don't rush to watch players, as they rarely miss the assistants you create. A head or volley will transform your pass into a nice goal. Don't fail too much! Result! The hero limits the number of times you play every day. There are five heart symbols in the right corner of the screen. After four failures, you will lose your heart (it turns gray), so in theory you will be defeated up to 20 times a day. Each heart takes 15 for recovery, but players can use the money to buy more playback. High Quality 3D Graphics Graphics Score! Hero is very practical thanks to 3D technology and careful developer care. The player's movement is quite flexible, smooth, toward the most serious experience for a player. You can review beautiful goals thanks to cut scenes and slow down video feature. Like other football matches, they are an integral part of commentators. Although their proverbs are not diverse, they are in line with the situations in the game. The joys of the audience and the comments of the commentators will bring you maximum emotion during the game. MOD APK version Result! HeroTo limit money: You can spend money in the game, don't worry about how much you have. In some devices, infinite energy can be stopped So when using ILO. Download Game Score! Hero MOD APK for AndroidScore! A hero is a football game worth playing at any time, especially when the 2018 World Cup is very attractive. The game supports iOS and Android operating systems, allowing you to download it for free. Download this game to your phone and hit some nice goals! Would!
